Part list

Plugs and drill bit are supplied, these are suitable for masonry and so a suitable bit and plug should be used or your wall type

STEP1: Wall profiles assembling

Point 1 and 4: the screws should be fitted to the inside

Place the wall channels against the wall and using a spirit level ensure these are vertical.

Position the wall channels with the lip on the inside, to be screwd to the wall.

Mark the drill holes through the wall channel.

Drill holes using a suitable drill bit for your wall type.
Insert wall plugs and tap in until flush with the finished wall.

Sealant can be applied between the wall channel and wall.

Place the wall channels against the wall and secure into position using screws and washers.

Push on the chrome screw cap covers.

STEP2:

STEP3:

Fixed glass panels Assembling

-Insert the fixed glass panels into the wall profiles.
(Note: please make sure the two glass panels are vertical with each other.)

STEP4:

STEP5:

STEP6:

STEP7: Magnetic Seals Assembling

-Push the magnetic seals onto the sliding doors.
Cut into required length.

STEP8:

Silicone Application

STEP9(1):

-Apply silicone sealant to all joints between wall profile, fixed glass panel, bottom aluminium alloy rail and tray.

STEP9(2):

- Apply silicone sealant to all joints between fixed glass panel, bottom aluminium alloy rail and tray.
- Do not use the enclosure for 24hours, to allow the silicone to dry completely.
